

✓ Emmet Shortcut

CSS

```
nav>article>ul>li*3
```

✓ Output (Expanded HTML)

html

```
<nav>
  <article>
    <ul>
      <li></li>
      <li></li>
      <li></li>
    </ul>
  </article>
</nav>
```

★ More Examples (Useful for practice)

1 **div>section>p*2**

html

```
<div>
  <section>
    <p></p>
    <p></p>
  </section>
</div>
```

2 header>nav>ul>li*5

```
html

<header>
  <nav>
    <ul>
      <li></li>
      <li></li>
      <li></li>
      <li></li>
      <li></li>
    </ul>
  </nav>
</header>
```

3 main>section.card*3>h2+p

```
html

<main>
  <section class="card">
    <h2></h2>
    <p></p>
  </section>
  <section class="card">
    <h2></h2>
    <p></p>
  </section>
  <section class="card">
    <h2></h2>
    <p></p>
  </section>
</main>
```

FULL EMMET CHEATSHEET (HTML + CSS)

(Everything you need in one place)

◆ 1. Basic HTML Elements

Emmet	Expands To
html:5	HTML5 template
!	Same as html5 boilerplate
div	
span	
p	
a	
img	
link:css	CSS link tag
script:src	Script with src

◆ 2. Nesting with Child (>)

Emmet	Output
nav>ul>li	<nav> </nav>
div>p>span	nested structure

◆ 3. Sibling (+)

Emmet	Output
h1+p	
header+main+footer	page layout

◆ 4. Multiplication (*)

Emmet	Output
ul>li*5	5 items

Emmet	Output
<code>section*3</code>	3 sections

◆ 5. Grouping (())

Emmet	Output
<code>div>(header+main+footer)</code>	siblings inside div
<code>ul>(li>a)*3</code>	list with anchor tags

◆ 6. IDs & Classes

ID

Emmet	Output
<code>div#box</code>	<code><div id="box"></div></code>

Class

Emmet	Output
<code>div.card</code>	<code><div class="card"></div></code>

Multiple Classes

Emmet	Output
<code>div.red.big.box</code>	<code><div class="red big box"></div></code>

ID + Classes

Emmet	Output
<code>div#main.container.dark</code>	<code><div id="main" class="container dark"></div></code>

◆ 7. Custom Text ({})

Emmet	Output
<code>p{Hello World}</code>	<code><p>Hello World</p></code>

Emmet	Output
<code>a{Click Me}</code>	clickable text

◆ 8. Numbering (\$) \$

Emmet	Output
<code>li.item\$*5</code>	item1, item2, item3...
<code>img.photo\$@3*4</code>	start numbering from 3

◆ 9. Attributes ([]) []

Emmet	Output
<code>input[type=text]</code>	<code><input type="text"></code>
<code>a[href=https://google.com]</code>	link with URL
<code>img[src=img\$@1.jpg alt=image]</code>	auto-numbered images

◆ 10. Common HTML Structures

Navbar

CSS nav>ul>li*5>a
--

Card UI

CSS div.card>img+h2+p
--

Article Layout

CSS

```
article>h1+p*3
```

Login Form

CSS

```
form>label+input[type=text]+label+input[type=password]+button{Login}
```

◆ 11. Tables

CSS

```
table>tr*3>td*4
```

◆ 12. Forms

less

```
form>input:text+input:email+input:password+button{Submit}
```

◆ 13. Emmet for CSS

Width & Height

Shortcut	Expands To
----------	------------

w100	width: 100px;
------	---------------

h50	height: 50px;
-----	---------------

w100p	width: 100%;
-------	--------------

h100vh	height: 100vh;
--------	----------------

Padding

Shortcut	Output
----------	--------

p10	padding: 10px;
-----	----------------

p10-20	padding: 10px 20px;
--------	---------------------

pt10	padding-top: 10px;
------	--------------------

Margin

Shortcut	Output
----------	--------

m20	margin: 20px;
-----	---------------

mt10	margin-top: 10px;
------	-------------------

mx-auto	margin: 0 auto;
---------	-----------------

Display

Shortcut	Output
----------	--------

d:f	display: flex;
-----	----------------

d:b	display: block;
-----	-----------------

d:i	display: inline;
-----	------------------

Flexbox

Shortcut	Output
----------	--------

jc:c	justify-content: center;
------	--------------------------

ai:c	align-items: center;
------	----------------------

fd:row	flex-direction: row;
--------	----------------------

◆ 14. Full Page Template

CSS

```
html:5>body>header+main+footer
```
