- Deployment.
 - Reports
 - Report creation in SNOW (we will not study Gauges as they are no longer supported)
 - Dictionary Override
 - Incident
 - Problem
 - Change(stand/normal/Emergency)
-

- **Live Project 1**

-----ADMIN OVER-----

Topic 3: (Development Starts from Here)

- Catalogs (service creations catalog) and its type (with variables)
- Attaching Knowledge article to the catalog.
- Catalog workflow (Creation of workflow).
- Record Producer.
- Flow(Designer)

- **----- Live Project 2 and 3**

- Agile Development 2.0
- Client-Side Introduction.
- UI policy
- Client Script
 1. Onload
 2. OnSubmit
 3. OnChange
 4. OnCellEdit
- Coding Introduction on Client-Side Scripting.
- Client-Side Api used in Coding (GlideForm (g_form) , g_userClass)

Topic 4:

- Server-Side Introduction
- Data Policy
- Business Rule
- Types and Coding Discussion:-
 1. Before
 2. After

- 3. Asyc--
 - 4. Display
 - Background Script/fix script
 - Coding Queries and Examples
 - Server-Side Api's (Glide-System API)
 - 1. GlideRecord
 - 2. Query-Conditions
 - 3. Encoded Query
 - 4. GlideDateTime ()
 - 5. GlideAggregate()
 - Coding Queries and Examples
 - Schedule Job(with Script)
 - UI action
 - Create Notification using Events /flow designer
-
- ACL Introduction
 - 1. Read—Read Access to the field level on the form
 - 2. Write—Write or Edit Access
 - 3. Create—Create the ACL

- **Live Project 4 and 5**

----- CMDB -----

Topic 1:

- CMDB Introduction.
- CMDB Overview and Uses in ServiceNow.
- Use of CMDB and Overview on Relationship.
- Meaning of CI (configuration).

Topic 2:

- CMDB Class Manager.
- Parent-Child CI relationship.
- CI Relationship.
- CI Relation builder.
- Level (I1,I2,I3) in CI
- Upstream & Downstream
- Parent Search and Child Search

Integration Schedule

Topic Integration:

- Integration Introduction.
- REST and Soap API Intro
- Table API.
- Post-Man uses and introductions.
- Example of Table API(using HTTP Methods
- POST, Get, Update etc.
- Via post man(get and post)method Demonstration
- Introduction To Rest Message
- How to configure Rest Message
- Rest Message (Advance Introduction).
- Post Man demo.
- HTTP Method(CURD Operation)
- Rest Message (Outbound-Details)
- HTTP Headers
- Content Type
- Integration with other instance (another SNOW instance).
- Using Business Rule.
- Integration Via catalog item submission(using Workflow)
- LDAP (light-weight directory –protocol).
- JIRA
