

HTML (Hyper Text Markup Language)

➤ Form in HTML :-

- **HTML form** is a section of a document which contains controls such as text fields, password fields, checkboxes, radio buttons, submit button, menus etc.
- An HTML form facilitates the user to enter data that is to be sent to the server for processing
- HTML forms are required if you want to collect some data from of the site visitor.

```
<form action="" method="">  
    //input controls e.g. textfield, textarea, radiobutton, button  
</form>
```

➤ HTML <input>

HTML <input>

- It is used to create form fields, to take input from user.

```
<input type="text" name="name">
```

type="text"

type="email"

type="password"

type="number"

type="checkbox"

type="radio"

type="file"

➤ HTML <textarea>

HTML <textarea>

- <textarea> tag in HTML is used to insert multiple-line text in a form.
- The size of <textarea> can be specify either using "rows" or "cols" attribute

```
<textarea rows="7" cols="20"></textarea>
```

➤ Submit Button

- it is used to add a submit button on web page.

```
<input type="submit" value="submit">
```

```
<button type="submit">Submit</button>
```

➤ <select> Tag

- HTML <select> tag is used to create a drop down list with multiple options.
- The <option> element is nested within <select> tag

```
<select>  
  <option>A</option>  
  <option>B</option>  
  <option>C</option>  
</select>
```

➤ <label> Tag

- it makes the code parser/browser/user friendly.
- If you click on the label tag, it will focus on the text control.
- To do so, you need to have for attribute in label tag that must be same as id attribute of input tag.

```
<form>  
  <label for="firstname">First Name: </label> <br/>  
  <input type="text" id="firstname" name="firstname"/> <br/>  
  
  <label for="lastname">Last Name: </label>  
  <input type="text" id="lastname" name="lastname"/> <br/>  
</form>
```

Example – 1

```
<!DOCTYPE html>
<html lang="en">
<head>
  <meta charset="UTF-8">
  <meta name="viewport" content="width=device-width, initial-scale=1.0">
  <title>Document</title>
</head>
<body>
  <fieldset> <legend>Enquiry Form</legend>
    <form action="#"></form>
    <label for="name">Name:</label>
    <input type="text">
    <br><br>

    <label for="mail">MailId:</label>
    <input type="email">
    <br><br>

    <label for="password">Password:</label>
    <input type="password">
    <br><br>

    <input type="button" value="Submit">

    <button>Submit</button>
  </body>
</html>
```

Output -

Enquiry Form

Name:

MailId:

Password:

Submit

Submit

Example – 2

```
<!DOCTYPE html>

<html lang="en">

<head>

  <meta charset="UTF-8">

  <meta name="viewport" content="width=device-width, initial-scale=1.0">

  <title>Document</title>

</head>

<body>

  <fieldset> <legend>Application Form</legend>

    <form action="#">

      <label for="name">Name:</label>

      <input type="text">

      <br><br>

      <label for="mail">EmailId:</label>

      <input type="email">

      <br><br>

      <label for="password">Password:</label>

      <input type="password">

      <br><br>

      <label for="DOB">DOB:</label>

      <input type="date">

      <br><br>
```

<label for="contact">Contact:</label>

<input type="Tel">

<label for="Gender">Gender:</label>

<input type="radio" name="Gender">Male

<input type="radio" name="Gender" id="">Female

<label for="Courses">Courses:</label>

<input type="checkbox" value="Web">Web

<input type="checkbox" value="Java" id="">Java

<input type="checkbox" value="Python" id="">Python

<label for="Address">Address:</label>

<textarea cols="10" rows="5"></textarea>

<label for="Branch">Branch</label>

<select>

<option value=""></option>

<option value="MANPA">MANPA</option>

<option value="DECCAN">DECCAN</option>

<option value="WAKAD">WAKAD</option>

<option value="BANER">BANER</option>

</select>

<label for="Passport Photo">Photo</label>

<input type="file">

<input type="range">

<input type="button" value="Submit">

<button>Submit</button>

</form>

</body>

</html>

Output -

Application Form

Name:

EmailId:

Password:

DOB:

dd-mm-yyyy

Contact:

Gender:

☐ Male

☐ Female

Courses:

☐ Web

☐ Java

☐ Python

Address:

Branch

Photo

➤ **Semantic Tags in HTML :-**

- Semantic tags are HTML tags that clearly describe the meaning and purpose of the content.
- They tell the browser and developer what type of content is inside the tag.
- They improve readability, SEO, and accessibility.

➤ **Why use Semantic Tags?**

- Makes HTML more meaningful.
- Helps search engines (SEO) understand content.
- Improves accessibility (screen readers).
- Easier for developers to maintain.

➤ **Common Semantic Tags in HTML –**

1. <header>

- Represents the header section of a page or a section (like logo, nav, title).

```
<header>
  <h1>Welcome to My Website</h1>
  <p>This is the header section.</p>
</header>
```

2. <div>

- A generic container used for grouping elements.
- Does not have meaning by itself (not semantic).

```
<div class="content">
  <p>This is the content section inside a div.</p>
</div>
```

3. <aside>

- Represents side content (like a sidebar, ads, or related links).

```
<aside>
  <h3>Related Links</h3>
  <p>Check out our tutorials and resources here.</p>
</aside>
```

4. <main>

- Represents the main content of the page (unique, only once per page).

```
<main>
  <h2>Main Content Area</h2>
  <p>This is where the main content of the page goes.</p>
</main>
```

5. <nav>

- Defines navigation links (menus).

```
<nav>
  <a href="index.html">Home</a> |
  <a href="about.html">About</a> |
  <a href="contact.html">Contact</a>
</nav>
```

6. <section>

- Represents a section of content grouped together under a theme.

```
<section>
  <h2>Our Services</h2>
  <p>We provide web development and design services.</p>
</section>
```

7. <time>

- Represents a date or time.

```
<p>Published on <time datetime="2025-08-25">August 25, 2025</time></p>
```

8. <article>

- Represents independent, self-contained content (like a blog post or news article).

```
<article>
  <h2>Blog Post Title</h2>
  <p>This is an independent blog article with its own content.</p>
</article>
```

9. <figure> and <figcaption>

- Used for images, diagrams, or charts with a caption.

```
<figure>
  
  <figcaption>A beautiful view of nature.</figcaption>
</figure>
```

10.<footer>

- It defines the footer section of a webpage or a section.

```
<footer>
```

```
  <p>&copy; 2025 My Website | All Rights Reserved</p>
```

```
</footer>
```
