Create a JIRA Account on the Free Version :-

Jira is commonly known for issue/bug tracking and also for helping the organization implement projects using [Agile Methodology](#). This tool first took attention in the year 2002 at that time it was used majorly for issue tracking later in 2012 Atlassian accelerated the business of JIRA by offering more functions in it.

Why a Free Account?

There are two major reasons for Free Accounts:

1. From Companies Perspective

Many other tools provide the requirements to the user. Companies used to provide Free and basic versions of their tools so that the new user can try their platform and if the customer get used to it then they will pay for it.

2. From User Perspective

If you are a beginner who wants to try and test different software present in the market. you can try those in free tools, you can check their user friendliness and also you can choose which tool is best suitable for you.

Quickstart

How to use JIRA?

Let's see how to use JIRA, from the very beginning(creating an Atlassian account).

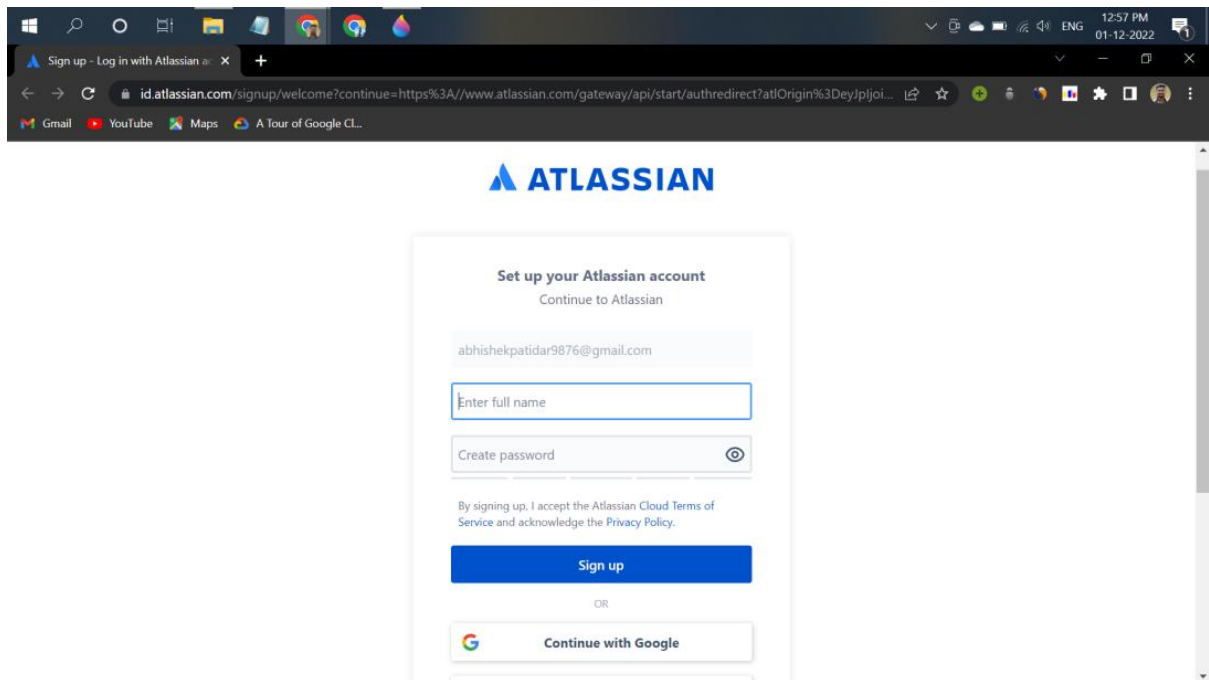

Step 1: Creating an Atlassian Account

1. Go to the signup page of Atlassian enter the required user credentials asked on the site and then click on the SignUp button.

Signup Page

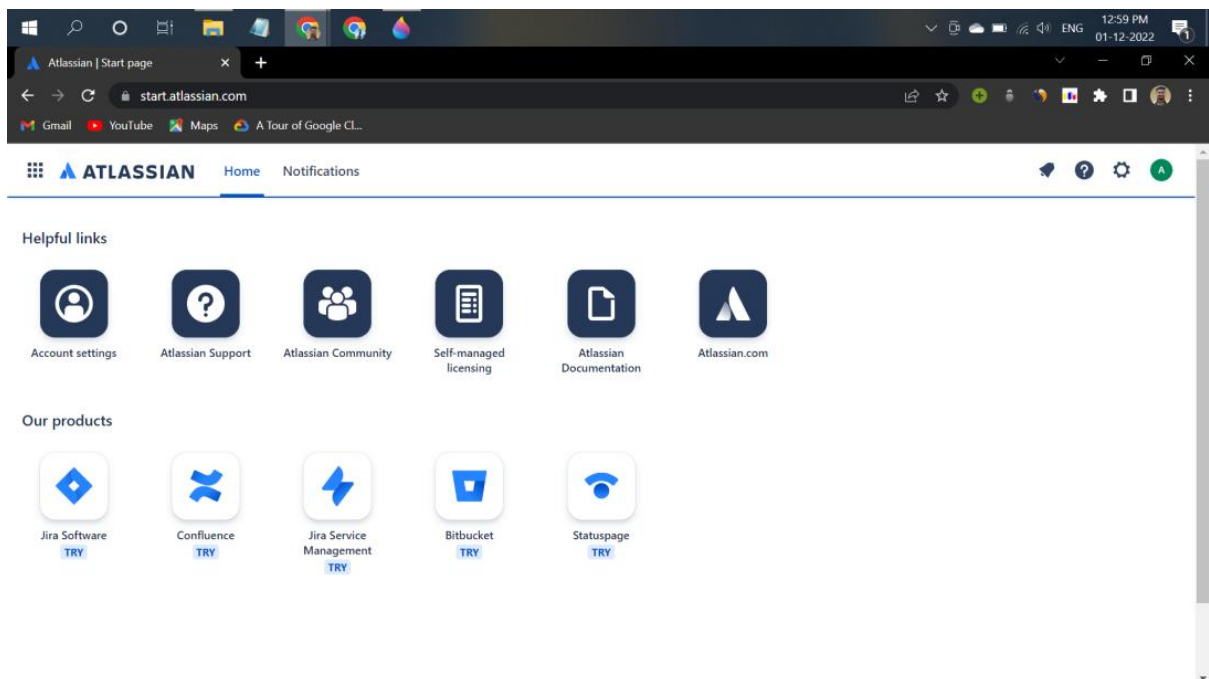

2. To complete the setup and login, click the verification link in the email box.
3. Set up your Atlassian account.

The screenshot shows a web browser window with the URL `id.atlassian.com/signup/welcome?continue=https%3A%2F%2Fwww.atlassian.com%2Fgateway%2Fapi%2Fstart%2Fauthredirect?atlOrigin%3DeyJp...`. The page features the Atlassian logo at the top. Below it, a central card titled "Set up your Atlassian account" with the subtitle "Continue to Atlassian" contains a form. The form includes an email field with the address `abhishekpattidar9876@gmail.com`, a "Enter full name" field, and a "Create password" field with an eye icon for toggling visibility. Below these fields is a line of text: "By signing up, I accept the Atlassian Cloud Terms of Service and acknowledge the Privacy Policy." A blue "Sign up" button is positioned below the text. Underneath the button is the word "OR" and a "Continue with Google" button featuring the Google logo.

4. Click on signup after filling details. The account has been created. The user is automatically redirected to the home page.

Home page

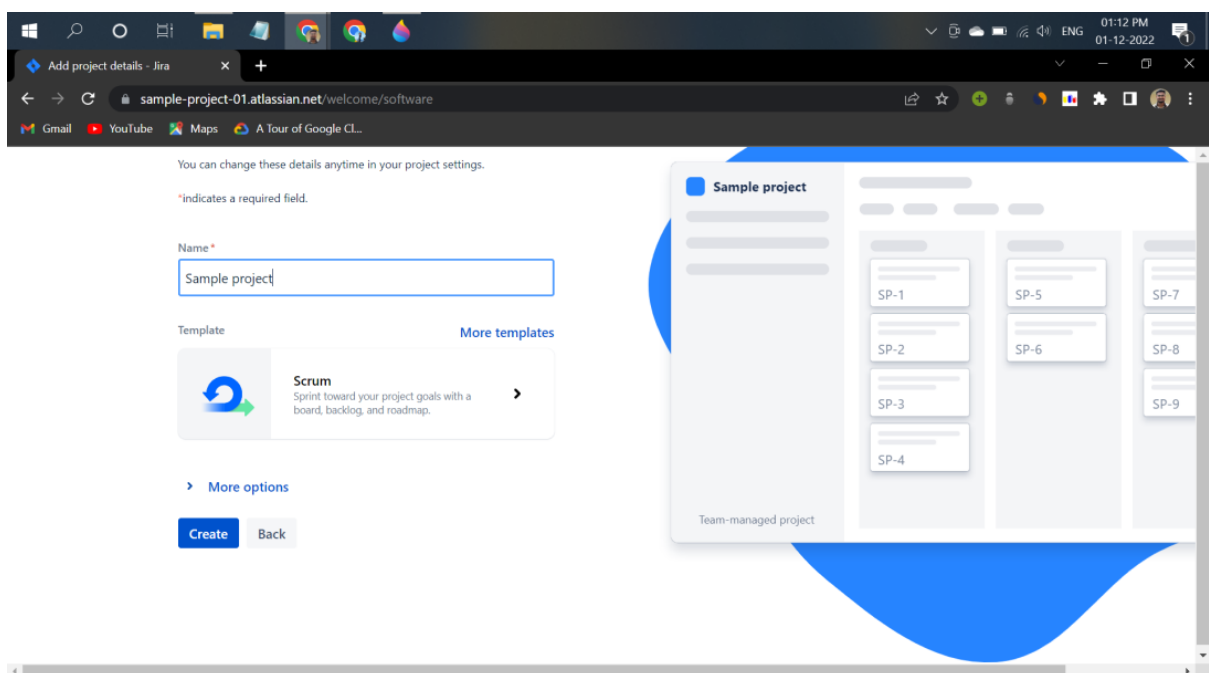

Step 2: Creating a new Project

1. Log in to your Atlassian account.
2. On the home page click on the **Jira software** and fill required details.

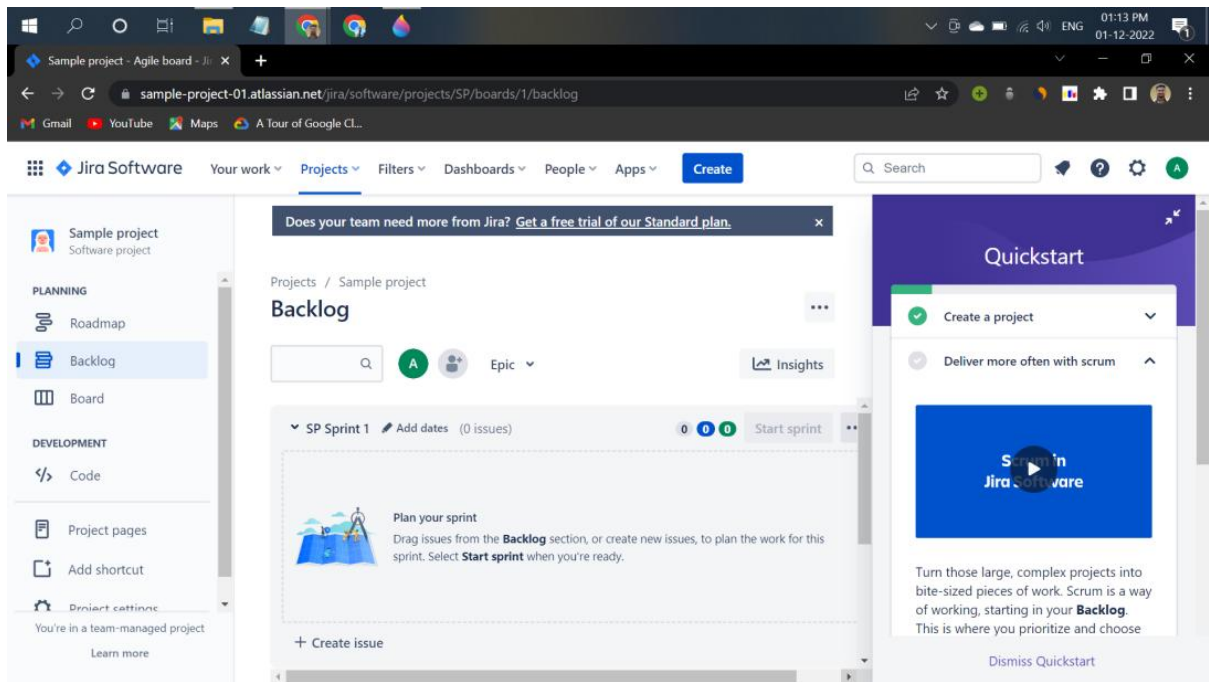

Jira Software

3. Answer some basic questions asked there to set up JIRA personally for your team.
4. Select your project name and template framework like Scrum or Kanban, etc. for your project.

Project Details

5. After completing the above steps, the following screen will be displayed:

Jira Software Home page

Four main sections are there:

- **Roadmap:** It is an action plan for how our project will evolve.
- **Backlog:** It is usually a list of issues describing what your team will be doing on the project.
- **Board:** It shows work to be done, work in progress, and work done.
- **Code:** In this, we can create an automated DevOps workflow and minimize context switching between Jira Software and Bitbucket, GitHub, GitLab, and other source code management tools.
