What is Scrum?

- Scrum is an Agile framework used to develop and deliver products.
- It helps teams work in small, manageable iterations called Sprints.
- Scrum focuses on team collaboration, transparency, and continuous improvement.
- Work is divided into tasks and tracked using a Product Backlog.

What is Jira Scrum?

- Jira Scrum is a Scrum project management tool provided by Atlassian.
- It helps teams plan, track, and manage Scrum-based projects.
- Jira Scrum uses a Scrum Board to visualize Sprint work.
- It supports backlog creation, sprint planning, and task assignment.
- Teams can track progress using burndown charts and reports.
- Jira Scrum improves team collaboration and delivery speed.

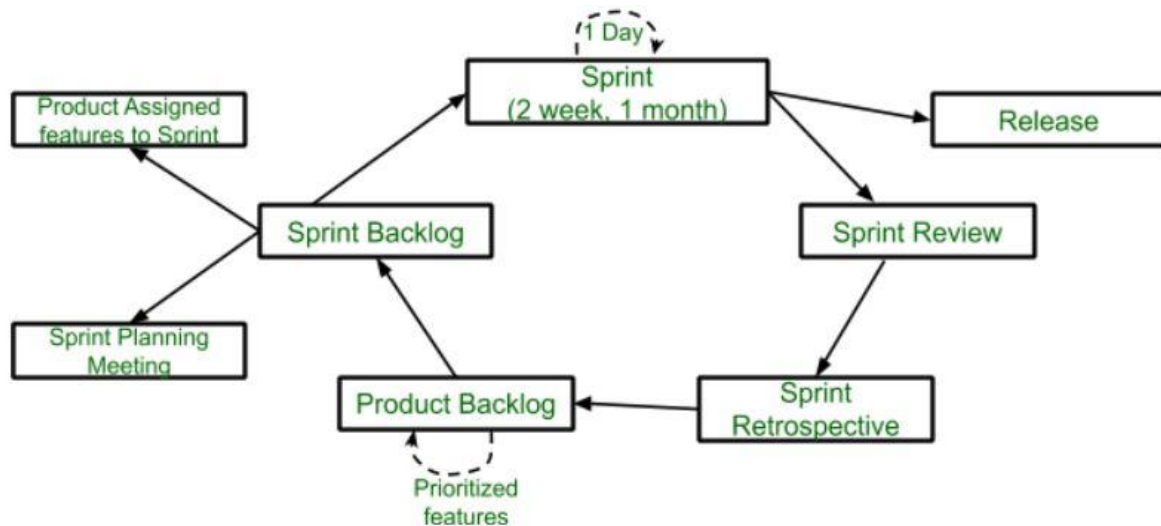

What is a scrum in software development?

- Scrum is a management framework used by teams to self-organize their work.
- It helps teams work together toward a common goal.
- Scrum is designed to handle complex and changing problems.
- It improves productivity and encourages creativity.
- Scrum focuses on delivering high-value products.
- It uses an iterative and incremental approach.
- This approach allows teams to adapt to changing requirements easily.

Silent features of Scrum :-

1. Scrum is a light-weighted framework
2. Scrum emphasizes self-organization

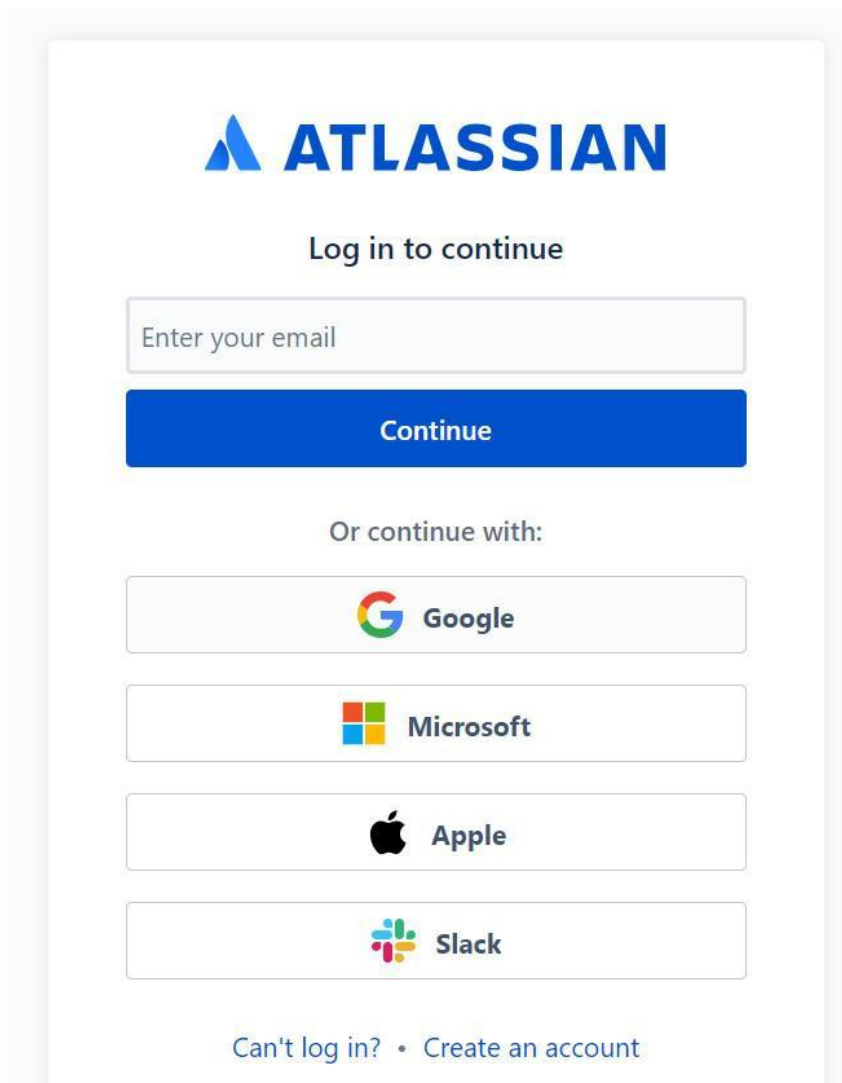

3. Scrum is simple to understand
4. Scrum framework helps the team to work together
5. Lifecycle of Scrum

1. **Sprint:** A Sprint is a time-boxed period of one month or less.
2. **Release:** Once the product is completed, it is moved to the release stage.
3. **Sprint Review:** The team reviews the product and checks incomplete or unachieved features.
4. **Sprint Retrospective:** The team evaluates product quality and overall progress.
5. **Product Backlog:** A prioritized list of all product features.
6. **Sprint Backlog:** A subset of Product Backlog items selected for the Sprint.

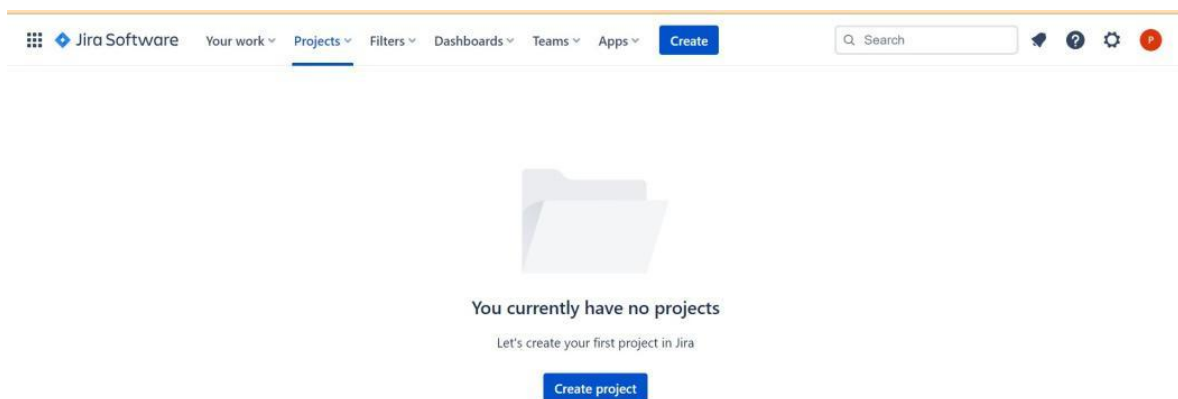

Creating Jira Scrum :-

Step 1: Log in to your Jira Account.

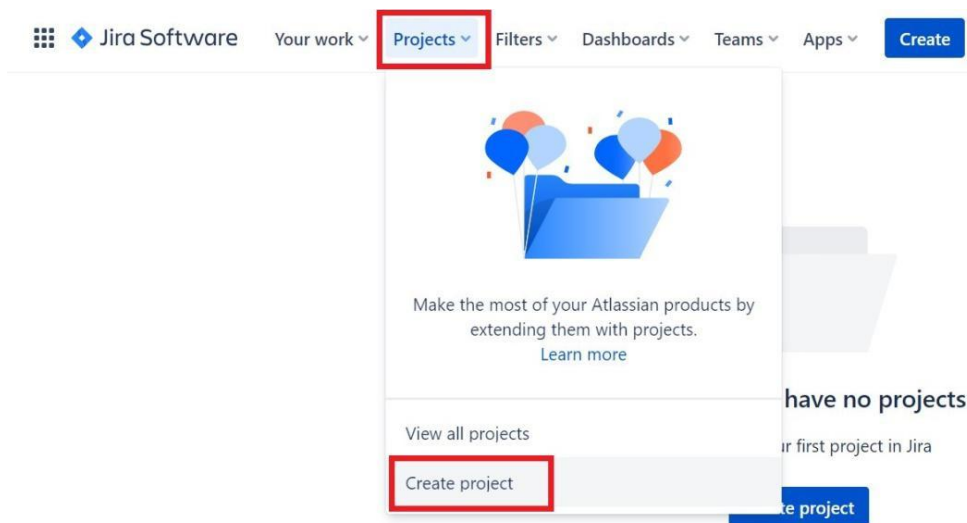

The image shows the Atlassian login page. At the top is the Atlassian logo. Below it is the text "Log in to continue". There is a text input field labeled "Enter your email". Below the input field is a blue "Continue" button. Underneath the button is the text "Or continue with:". Below this text are four buttons for social login: "Google", "Microsoft", "Apple", and "Slack". At the bottom of the page are two links: "Can't log in?" and "Create an account".

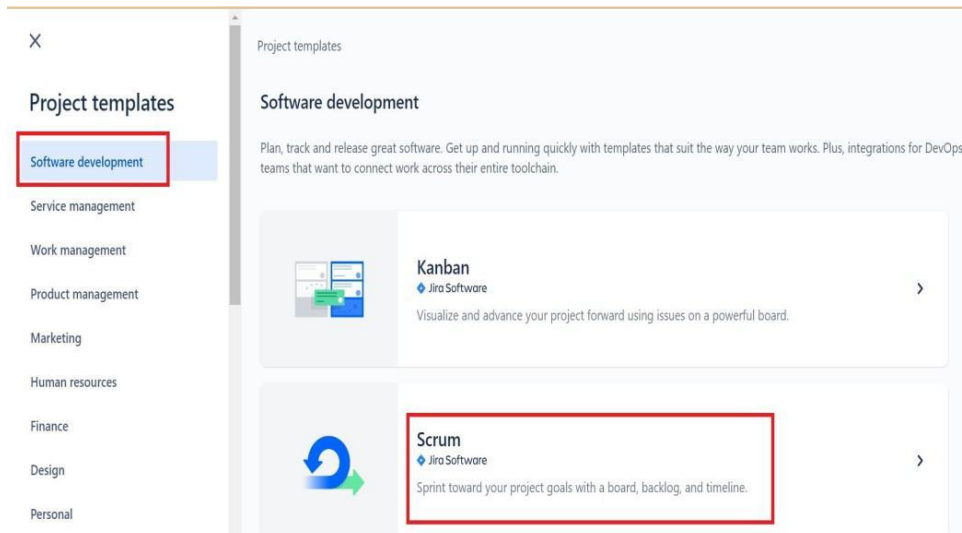

Step 2: You will be landed on the Jira Dashboard.

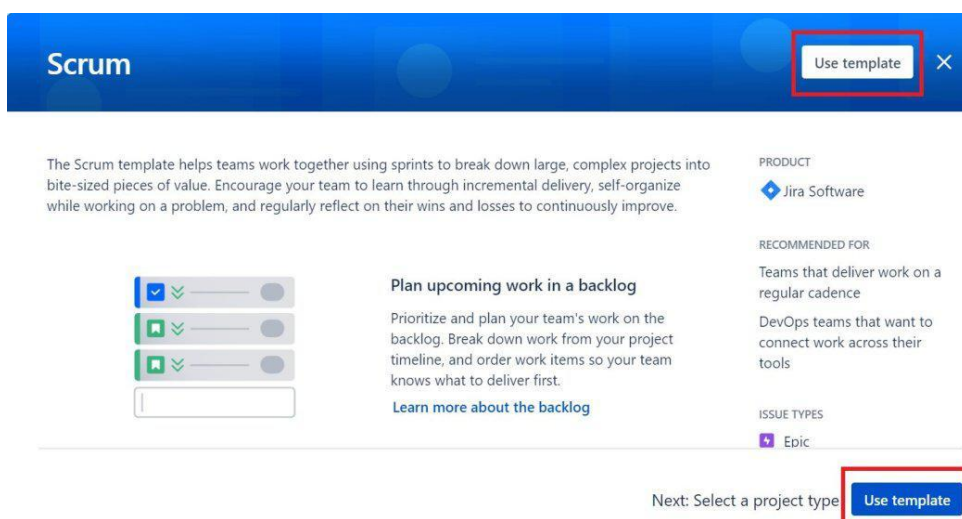

Step 3: Click on Create New Project.

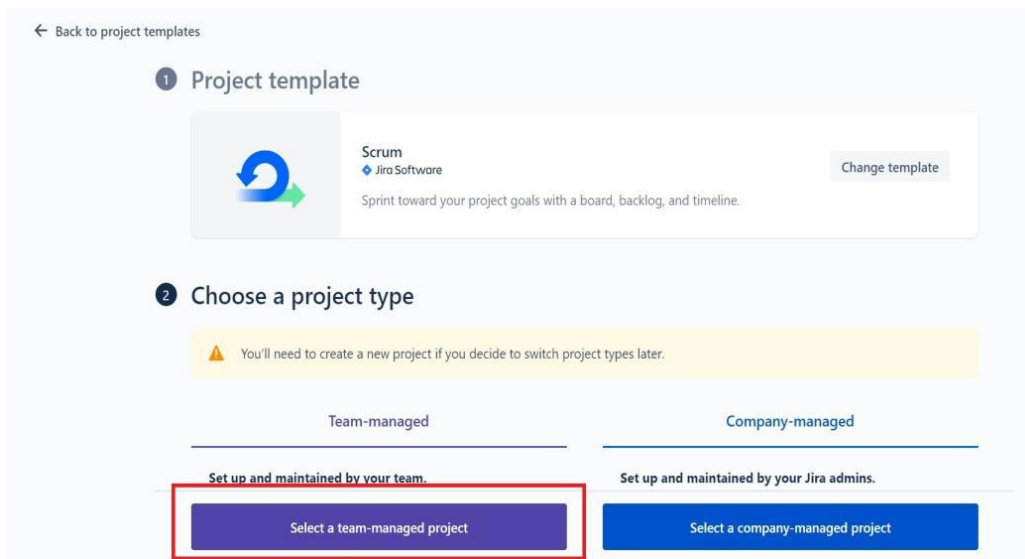

Step 4: Select Scrum Template.

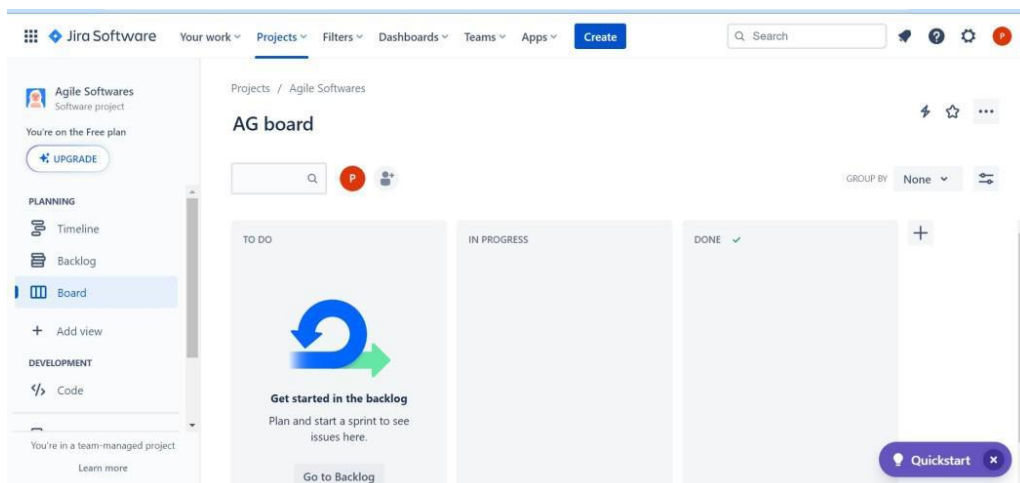

Step 5: Select the 'Use Template' option.

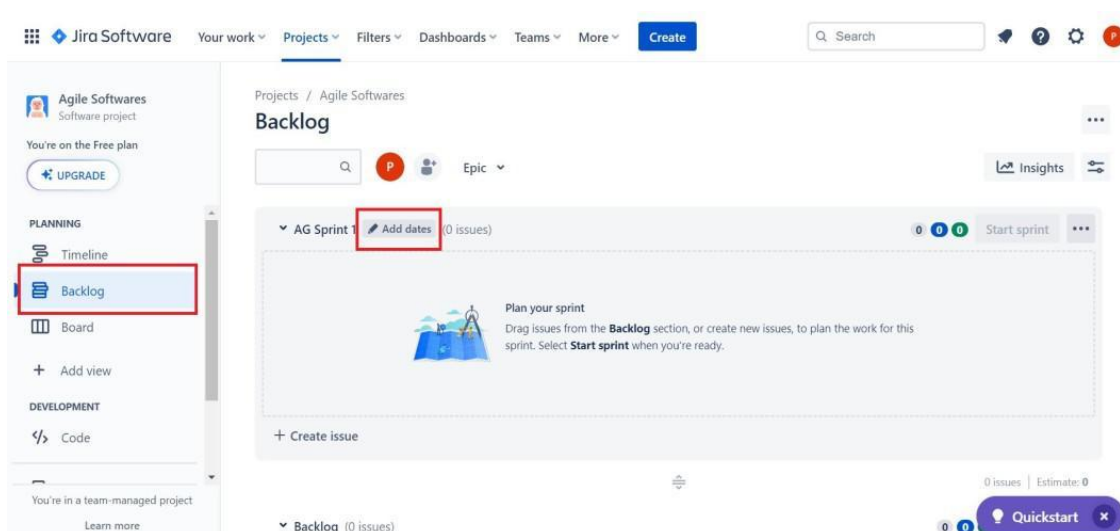

Step 6: Select 'Team Managed Project'.

Step 7: Your Jira Scrum Board is Created.

Step 8: Click on Backlog and Click on Add Dates to create Sprint.

Step 9: You can edit the name of Sprint and give duration and description as per your need.

Edit sprint: AG Sprint 1

2 weeks

Start date

10/17/2023 1:00 AM

End date

10/31/2023 1:00 AM

Sprint goal

Update

Cancel

Step 10: Scroll down and click on Create New Sprint.

▼ Backlog (0 issues)

0

Create sprint

Your backlog is empty.

+ Create issue

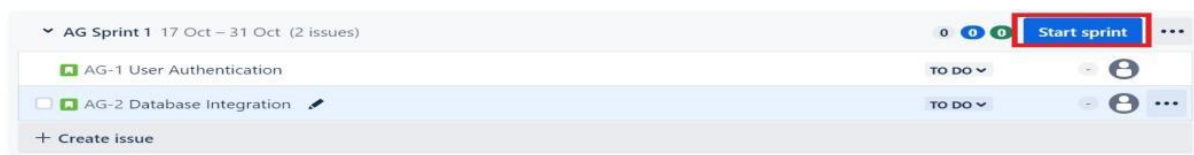

Step 11: Add some backlog.

Step 12: Create a Backlog as per your requirement or you can follow the below screenshot.

Step 13: Now drag and Drop 1st two issues to Sprint 1 and click on Start sprint.

Step 14: Give any detail if required there for demo purposes I gave some sample goals and click on 'Start'.

Start Sprint

2 issues will be included in this sprint.

Required fields are marked with an asterisk *

Sprint name *

AG Sprint 1

Duration *

2 weeks

Start date *

10/31/2023

5:05 PM

Planned start date: **10/17/2023, 1:00 AM**

A sprint's start date impacts velocity and scope in reports. [Learn more.](#)

End date *

11/14/2023

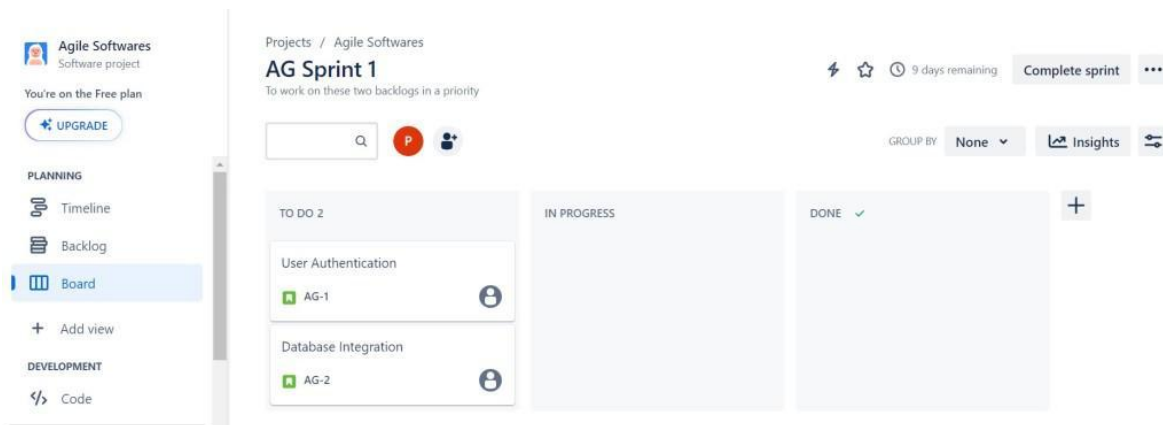

5:05 PM

Sprint goal

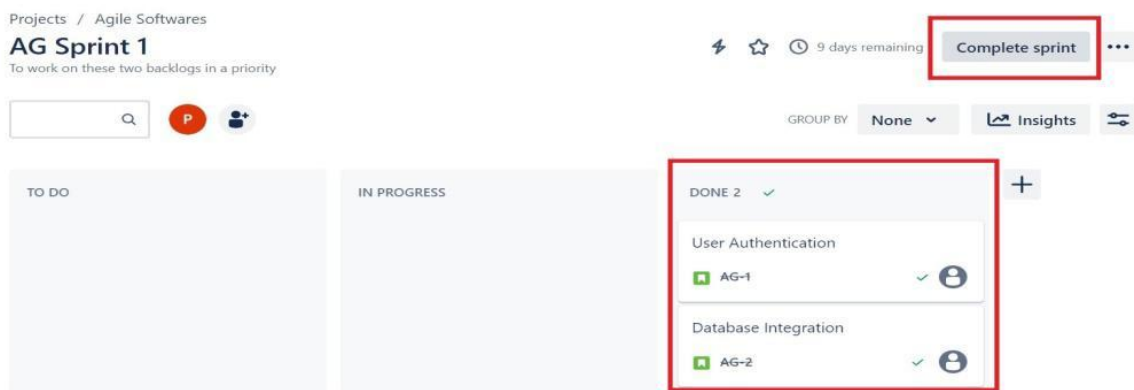

To work on these two backlogs in a priority

Step 15: Now Automatically your Jira Board will open.

Step 16: For Demo Purpose, I am moving both the 'To Do' towards 'Done'. and hit 'Complete Sprint'.

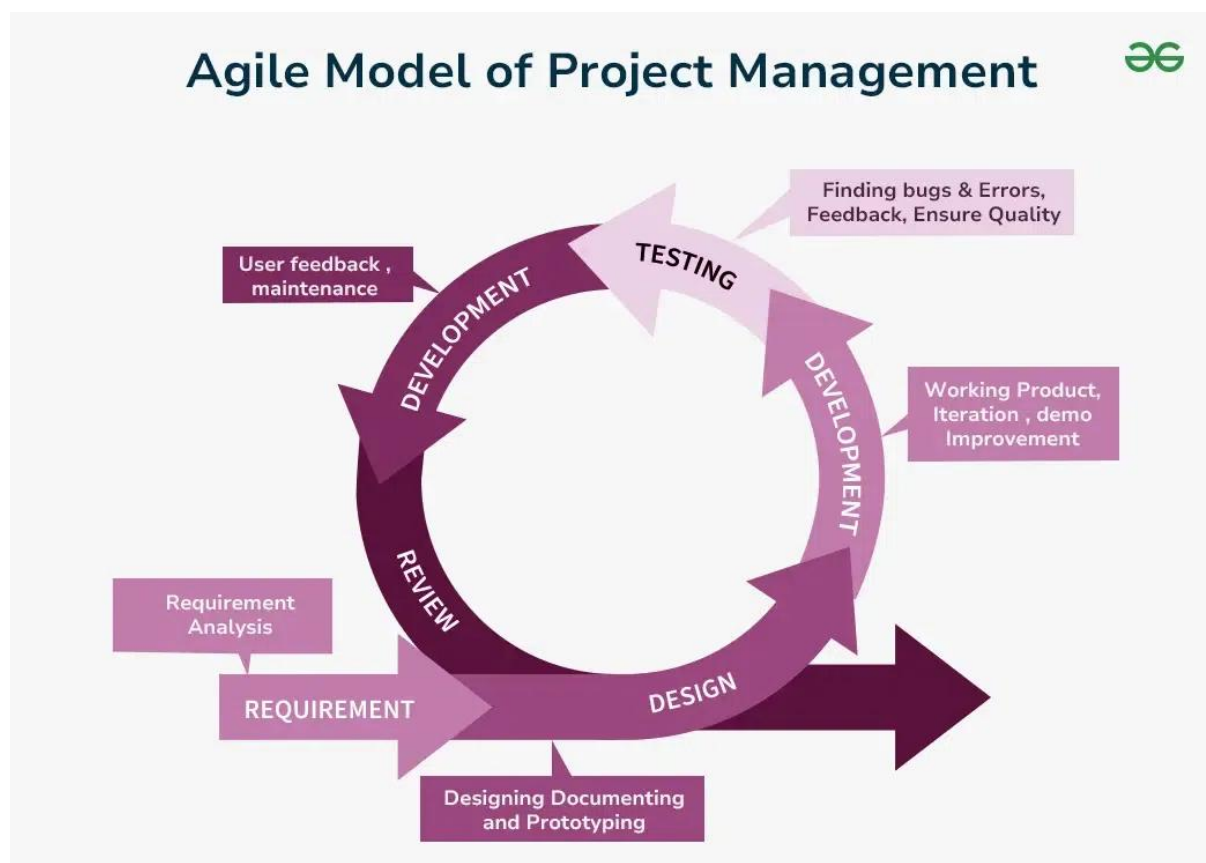

This is how you can create Sprint and Complete Sprint in Jira Board you can also add and comments on the backlog work. Now, you can repeat the same step for Sprint 2 and so on.

What is a Sprint?

- A Sprint is a fixed time period in Scrum.
- It usually lasts 1 to 4 weeks.
- Work is planned at the start of the Sprint.
- The team develops and tests features.
- Each Sprint delivers a working product increment.

What are the Stages of Sprint?

- Every Sprint has a clear, predefined goal.
- It ends with a potentially shippable product increment.
- Sprint Planning is conducted at the start.
- A Sprint Backlog is created from the Product Backlog.
- The team works on selected items during the Sprint.

- Sprint is a part of the Scrum framework.
- A Scrum Team is responsible for executing the Sprint.
- There are three main Scrum roles in a Sprint.

1. Product Owner

- Represents the stakeholders and organization.
- Manages the Product Backlog and priorities.
- Decides what to build and when to release.

- Guides the team on feature importance.

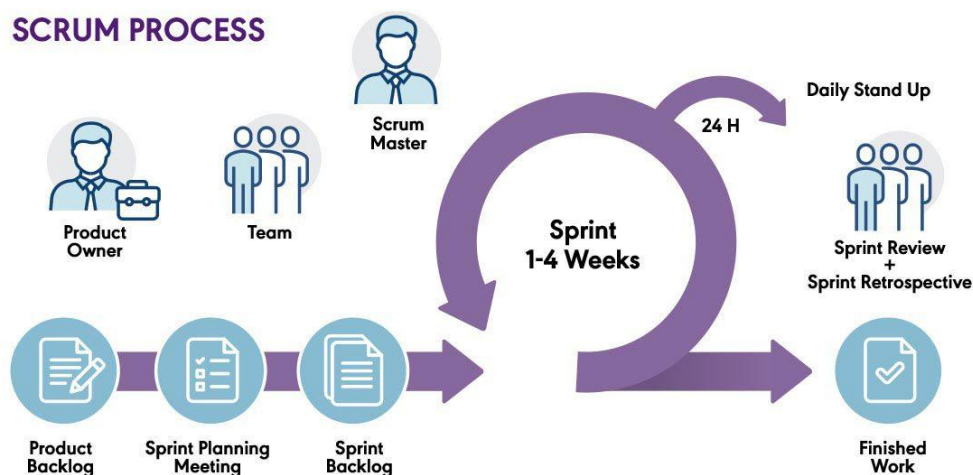

2. Scrum Master

- Acts as a facilitator and coach.
- Ensures Scrum rules and practices are followed.
- Removes obstacles faced by the team.
- Helps Scrum events run effectively.

3. Development Team

- Consists of developers, testers, designers, QA, and analysts.
- Responsible for building the product increment.
- Estimates work and completes Sprint tasks.
- Self-organizes to achieve Sprint goals.

Sprint Workflow and Process :-

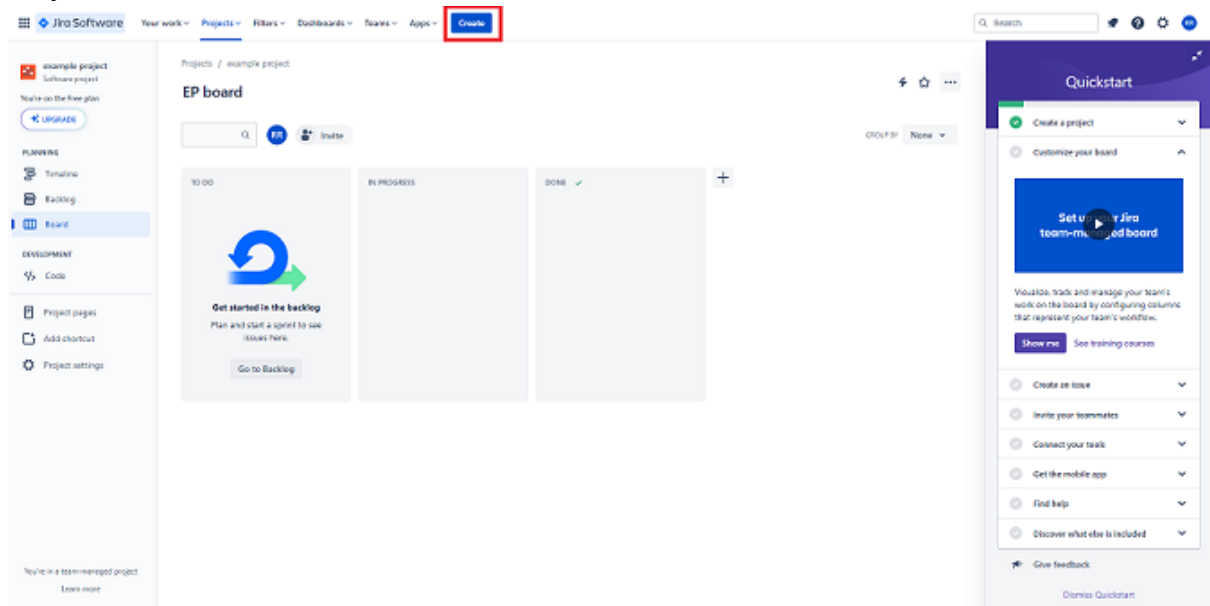

1. Sprint starts with Sprint Planning.
2. Sprint goal is defined.
3. Sprint Backlog is finalized.
4. Development work begins.
5. Daily Scrum is conducted every day.
6. Team designs, codes, tests, and integrates.
7. Sprint ends with Sprint Review.
8. Product increment is demonstrated.
9. Sprint Retrospective is conducted.
10. Improvements are planned for the next Sprint.

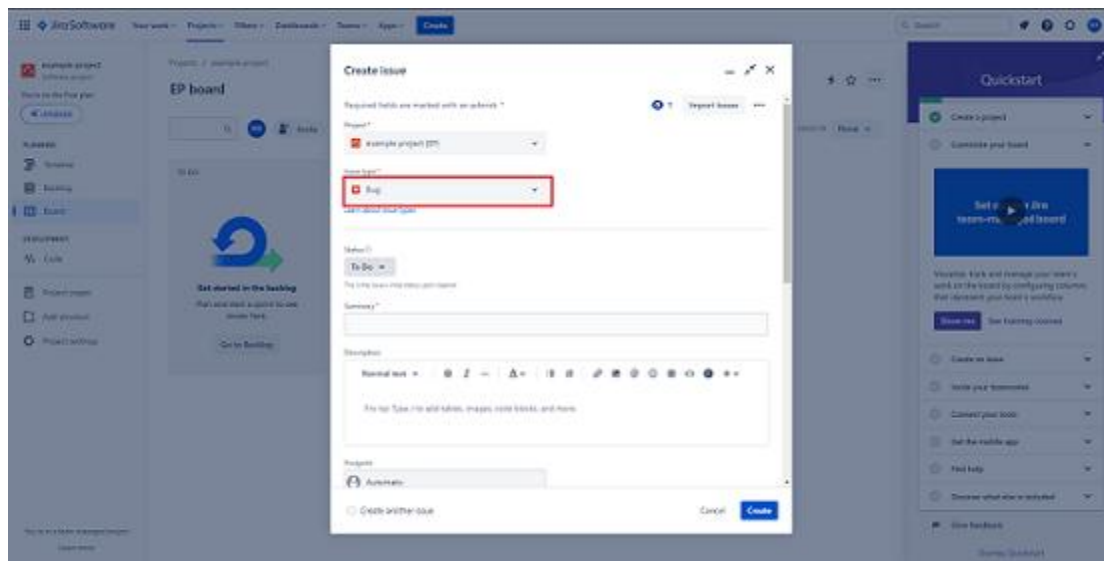

How to create Bugs in Jira?

Step 1: Open Jira and select the project in which you want to create the bug.

Step 2: Click on the "Create" button.

Step 3: A new window will open. Select the project and select the issue type as "Bug".

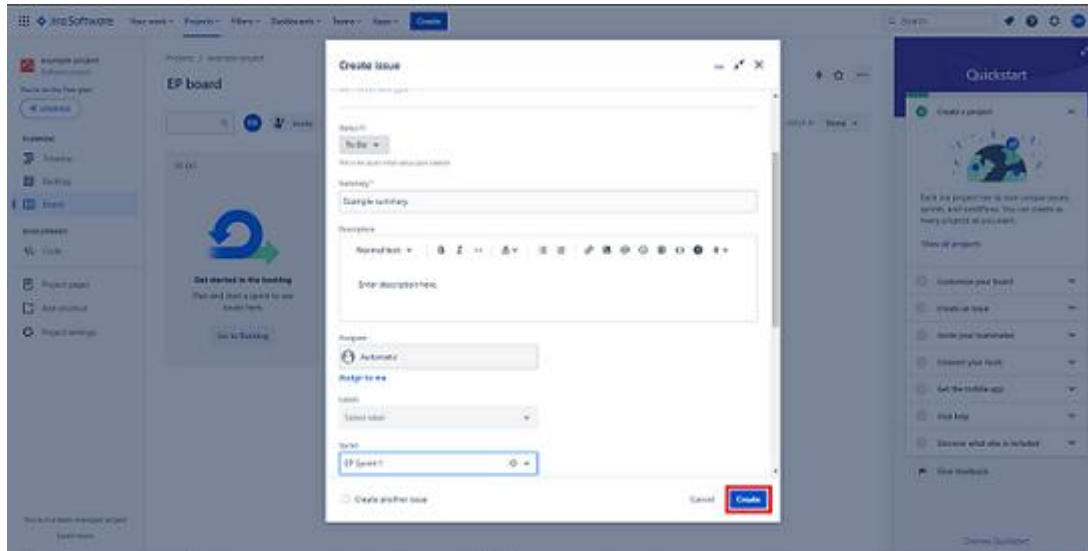

Step 4: You will be presented with a form to fill out other important details of the bug.

1. **Summary:** Short and clear title of the bug.
2. **Description:** Explain the issue, expected result, and actual result.
3. **Environment:** Specify OS, browser, test environment, etc.
4. **Assignee:** Person responsible for fixing the bug.
5. **Sprint:** Select the current or relevant sprint.
6. **Reporter:** Team member who identified the bug.

7. **Attachment:** Add screenshots, logs, or supporting files.
8. **Priority:** Set importance (Blocker, Critical, Medium, Minor, Low).
9. **Severity:** Define impact level (Sev-1 to Sev-5).

Step 5: Submit the bug

What are Sprint Reports in Jira :-

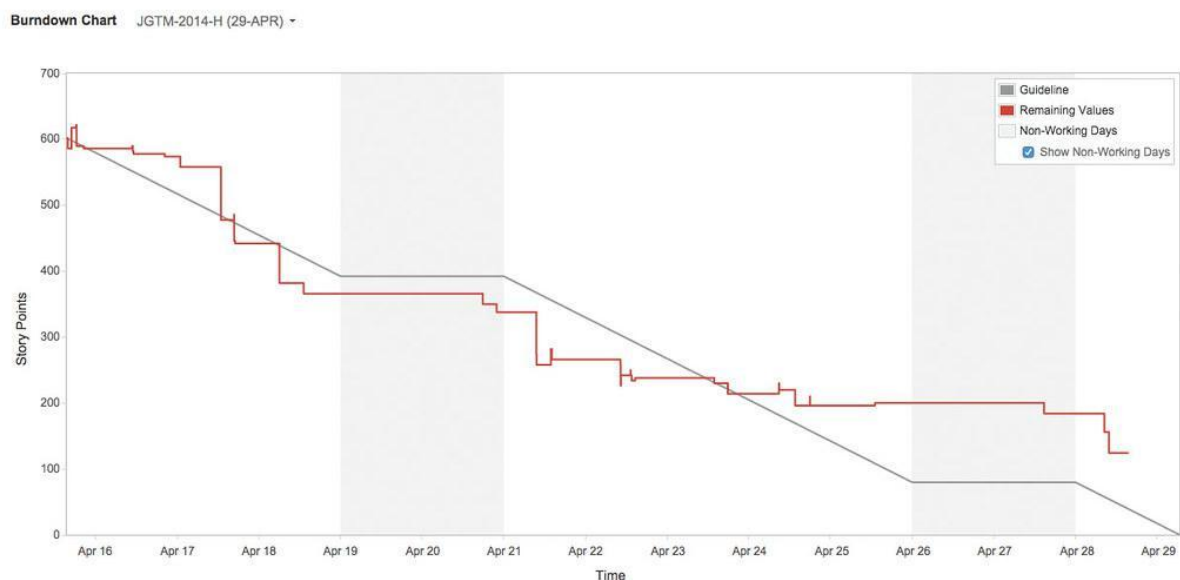

- Sprint Reports give insights into project and sprint progress.
- Available only for Scrum boards in Jira.
- Show a condensed burndown chart.
- Display completed and incomplete issues.
- Provide a summary of sprint progress till date.
- Helpful for Sprint Retrospective meetings.
- Also used to track mid-sprint progress.

How to Check Sprint Report in Jira?

- Sprint Report shows progress and performance of a sprint.
- Displays completed, added, and removed issues.
- Helps teams make better sprint decisions.

Steps to View Sprint Report

1. Open Jira and click Projects.
2. Select the required project.
3. Click Reports from the left panel.
4. Select Sprint Report.
5. Use the sprint dropdown to view current or past sprints.

In a Sprint burndown chart, the horizontal axis represents time and the vertical axis represents the number of issues in the sprint. The grey line shows the ideal progress, while the red line shows the actual progress of the sprint, and grey vertical areas indicate non-working days.
